

## Summary

iQ3 Cloud Compute encapsulates private, public and hybrid cloud models which are underpinned by iQ3's high-performance, low-latency network fabric. Our virtualisation management capabilities include hosting and patching, capacity, performance, storage and network management. Utilising highly scalable, redundant servers, our cloud compute service provides your organisation with the flexibility to scale up and down, depending on your requirements and cost efficiencies to meet business demands.

iQ3 Cloud Compute offers a number of compute and storage service tiers to allow you to optimise your workload cost and performance.
