

### Summary

iQ3's cloud network fabric and connectivity hub utilises high-performance dark fibre to connect multiple Tier-3 data centres across NSW. This high-latency low-redundant network fabric will provide your organisation with high-speed access to all iQ3 cloud services across public, private and hybrid cloud models.

Through migrating to iQ3's resilient network, your organisation has the ability to expand whilst managing costs, as well as receiving access to more tailor-made services and solutions offered by iQ3.

### Benefits

- Multiple points of presence
- Multiple connectivity options
- High-performance
- Optimal availability
- Peering with major content providers
- Secure VPN access for remote users

### Inclusions

- 10GbE - 40GbE connectivity
- High-bandwidth, low-latency network
- Monthly trending reports
- 24/7/365 support
- Redundant links
- Dark fibre cabling
- SD-WAN, SDN, NFV options available

## ABOUT IQ3

### Who are we

iQ3 are an agile and dynamic Australian IT company delivering Infrastructure-as-a-Service (IaaS) via private, public and hybrid cloud solutions. With our head office in Sydney and regional offices across APAC, iQ3 provides solutions across a wide range of industry sectors including government, education and commercial organisations.

iQ3 continues to deliver value and relevance to our clients who appreciate their flexibility and experience in delivering highly effective and commercially viable solutions. This has gained iQ3 a strong reputation as leaders in the infrastructure and cloud solutions marketplace.
